Figma

Html / Css / Javascript

Bootstrap

Tailwind css

PHP/ Laravel

Profile

I solve people's problems by providing a solution using my creativity as well as my technical skills. Formerly a web developer, I started as a product designer in order to focus more on the freedom to create and hone my creativity in creating a product/service solution. Here is the link to my portfolio containing my work: <https://www.gilbert-trinidad.com>

Experiences

2021 Product designer at Unfate

Creation of mock-ups of the unfate website with the Figma tool, design of a lesson with the quizzes and the assessment. Link of the website: <https://app.unfate.co/>

2021 Laravel backend developer at epresspack

Improvement of a sass, creation of a module for managing events, making appointments between providers and their clients.

2020 – 2019 Fullstack developer at Bimediatv

Form in Laravel, Contact form in Vuejs, Generation of information (horoscope) for distribution on points of sale. Migration of an ad site in php 4 to php 5. Carry out broadcasting on points of sale.
